

GAWVEL.

*We help
people get
justice on time.*

WHAT WE DO

Citizens' Gavel is a human rights focused nongovernmental organization with the aim of increasing the pace of justice delivery through access to justice, digital technology and citizen's engagement.

Out of the abundant civil society organization in Nigeria, we have taken full responsibility to address judicial stagnancy and poor representation of Nigerians in the court of law. With the use of data and records available in federal, state and magistrate courts, we detail the progression and retrogression of cases - both criminal and civil so as to give a common Nigerian that much needed idea of the judiciary's push for justice.

JUSTICE CLOCK PLATFORM

The screenshot shows the GAVEL website interface. At the top, there is a navigation bar with the GAVEL logo, a search bar, and links for HOME, CASES, CAUSE LIST, LOGIN, SIGN UP, and BLOG. Below the navigation bar, a text block reads: "Here are some recent cases that we are helping to get timely justice for".

Four case cards are displayed, each featuring a person icon, a name, a crime description, a case ID, and a 'JUSTICE CLOCK' showing time remaining in years, days, hours, and minutes. Each card includes a 'Follow Case' button.

Name	Crime Committed	Case ID	YR(S)	DY(S)	HR(S)	MI(S)	SE(S)
Sunday	Conspiracy to rape	5920810	0	92	14	23	14
Lateef W.	Stealing	8022433	0	184	22	9	14
Saliu	Burglary and Stealing	2520740	4	41	14	24	14
Akeem	Armed Robbery	3720942	5	321	14	33	14

Justice Clock is a platform that keeps track of time frame of any case with the right amount of inquisitive questions to enlighten the masses on the current state of that particular case. That is why we have the legal clock which is on our platform. We put some of the data there. It is an automated system so you know the number of days spent by an individual. We then compare the justice clock with the number days that should be spent so once they spend more than the days required by the law, we either file a case on their behalf, or we interact with the Ministry of Justice to see how we can proffer solutions and accelerate the pace at which their cases can be heard.

Sojiare is a Birmingham, United Kingdom headquartered platform that verifies the validity of organizations, governments, institutions, emails, e-commerce and content from different sources.

It uses AI to identify the authenticity of content sources and flags down scam-related content. Sojiare allows users to validate the sources of different business-related content and allows brands/companies to register their platforms as legitimate entities, helping them build trust with their audience.

WHY SOJIARE CAME TO BE

Now and then, people deal with content from brands, individuals, and even government institutions with no idea how to separate original from fake sources; some have unfortunately fallen victim to different forms of scams.

OjSiare is established to avoid uncertainty, ensure online safety, justice, and equity.

Sojiare works as a subordinate body of Justice Lab, the legal desk of Citizens' Gavel Foundation for Social Justice.

With Sojiare, we are devoted to building that trust for brands, individuals and government bodies, making communication and transactions efficient and reliable.

PROGRESS SO FAR

The analysis of state high courts according to their speed of delivery justice has been one of our frontier yearly project. It has afforded us a great deal of performance assessment of the Judiciary with available data to informed decisions.

And with the emergence of the earlier talked about platforms - Justice Clock and Sojiare, we have given premium attention to Nigerian justice sector as our response to ills and deteriorating state of the judiciary and the need to make the practice a lot more advanced using technology.

CONCLUSION

Since the start of Citizens Gavel in 2017, there has been a high turnaround in the operation of law all thanks to our advantageous use of technology and rapid response to calls for legal representation of Nigerians. Our greatest joy is derived from seeing the fast pace of justice delivery. We still have a long way to go but we remain appreciative to renewed interest from all stakeholders.
